Introduction to Aluminium casting technology | Professional industrial design services, High value-added mold and High quality product suppliers
Introduction to Aluminium casting technology, First-rate Mold Solution Co. Ltd is based in China and engaged in supply of industrial design, mold design, molding analysis and project management service.

Introduction to Aluminium casting technology ...

Aluminum is soft, lightweight, fire-proof and heat-resistant, easy to work into new shapes, and able to conduct electricity. It reflects light and heat very effectively and it doesn't rust. It reacts easily with other chemical elements, especially oxygen, and readily forms an outer layer of aluminum oxide if you leave it in the air.

Aluminum - introduction, properties, manufacture, and uses

Aluminum, or aluminium (Al), is a silvery white metal with a melting point of 660 °C (1,220 °F) and a density of 2.7 grams per cubic cm. The most abundant metallic element, it constitutes 8.1 percent of Earth's crust. In nature it occurs chemically combined with oxygen and other elements. In the pure state it is soft and ductile, but it can be alloyed with many other elements to increase ...
