Introduction to the First Edition. August 13th, 2015. Over the past few years, ever since writing a blog post called "If Susan Can Learn Physics, So Can You," I've been contacted by people from all backgrounds who are inspired and want to learn physics, but don't know where to start, what to learn, what to read, and how to structure their studies.I've spoken with single mothers who want to ...

The covariant formulation of classical electromagnetism refers to ways of writing the laws of classical electromagnetism (in particular, Maxwell's equations and the Lorentz force) in a form that is manifestly invariant under Lorentz transformations, in the formalism of special relativity using rectilinear inertial coordinate systems.These expressions both make it simple to prove that the laws ...

Hukum induksi Faraday adalah hukum dasar elektromagnetisme yang memprediksi bagaimana medan magnet berinteraksi dengan rangkaian listrik untuk menghasilkan gaya gerak listrik- fenomena yang disebut sebagai induksi elektromagnetik.Hukum ini adalah prinsip dasar operasi transformator, induktor, dan banyak tipe motor listrik, generator listrik, dan solenoid.

The principle of least action is the basic variational principle of particle and continuum systems. In Hamilton's formulation, a true dynamical trajectory of a system between an initial and final configuration in a specified time is found by imagining all possible trajectories that the system could conceivably take, computing the action (a functional of the trajectory) for each of these ...
