### Introduction To Genetic Analysis Griffiths

A genetic disorder is a health problem caused by one or more abnormalities in the genome. It can be caused by a mutation in a single gene (monogenic) or multiple genes (polygenic) or by a chromosomal abnormality. Although polygenic disorders are the most common, the term is mostly used when discussing disorders with a single genetic cause, either in a gene or chromosome.

### Genetic disorder - Wikipedia

The genetic history of Indigenous peoples of the Americas (also named Amerindians or Amerinds in physical anthropology) is divided into two sharply distinct episodes: the initial peopling of the Americas during about 20,000 - 30,000 years ago (20–30 kya), and European contact, after about 500 years ago. The former is the determinant factor for the number of genetic lineages, zygosity ...
