strikes a small ball with various clubs from a series of starting points (teeing grounds) into a series of holes on a course. The player who holes his ball in the fewest strokes wins. The origins of the game are difficult to ascertain, although evidence now suggests that early forms of golf were played in the Netherlands first and then in Scotland.

Introduction. A widely used vocabulary for risk management is defined by ISO Guide 73:2009, "Risk management.Vocabulary." In ideal risk management, a prioritization process is followed whereby the risks with the greatest loss (or impact) and the greatest probability of occurring are handled first. Risks with lower

performance has received much attention in the sport psychology literature. Some of the early theories include the inverted-U hypothesis,<sup>6</sup> drive theory,<sup>7</sup> and reversal theory.<sup>8</sup> The inverted-U hypothesis suggests that performance and anxiety should be viewed on an inverted U-shaped continuum. According to Yerkes and Dodson,<sup>6</sup> low

Social construction of technology (SCOT) is a theory within the field of science and technology studies. Advocates of SCOT—that is, social constructivists—argue that technology does not determine human action, but that rather, human action shapes technology. They also argue that the ways a technology is used cannot be understood without understanding
