A product team can function without a problem defined—it happens all the time. But when an explicit statement declares what problem needs to be solved, every effort is focused on that single outcome. A well-framed design problem statement that is documented as part of a product design brief is a simple tool to weigh options and measure success.

Karl Marx's theory of alienation describes the social alienation (Entfremdung, estrangement) of people from aspects of their human nature (Gattungswesen, 'species-essence') as a consequence of living in a society of stratified social classes. The alienation from the self is a consequence of being a mechanistic part of a social class, the condition of which estranges a person from their humanity.

Karl Marx (1818–1883) is often treated as a revolutionary, an activist rather than a philosopher, whose works inspired the foundation of many communist regimes in the twentieth century. It is certainly hard to find many thinkers who can be said to have had comparable influence in the creation of the modern world.
