A short example illustrates how field calculator works when using the Expression tab. We want to calculate the length in km of the railroads layer from the QGIS sample dataset: Load the shapefile railroads.shp in QGIS and press Open Attribute Table. Click on Toggle editing mode and open the Field Calculator dialog.

Field Calculator - QGIS

In this tutorial I will discuss the concepts, strategies and tools within QGIS to achieve a high accuracy georeferencing. Overview of the task¶ We will use a scanned map of southern India from 1870 and geo-reference it using QGIS. Other skills you will learn¶ How to determine datum and coordinate system for old maps. Get the data¶

Georeferencing Topo Sheets and Scanned Maps — QGIS ...

Using OSM Data in QGIS. Reviewed 2021-05-15. QGIS (formerly Quantum GIS) is a full-featured, open-source, cross-platform Geographic Information System. With QGIS you can access up-to-date OSM data whenever you want, select the tags you want to include, and easily export it into an easy-to-use SQLite database or Shapefile.

Using OSM Data in QGIS - LearnOSM

Collections of free to use QGIS style xml-files to download and import. To use the url, click the copy button, then paste the url in QGIS style manager import dialogue. This is only a static example. More development is on GitHub, and a "dynamic" test site is at a Test Site.

QGIS Style-Hub Downloads

There is Layers panel on the left side of the window, which lists map layers in current QGIS project. Layer items are grouped into DEM, Point, Line and Polygon. DEM layer group has 1-band raster layers (GDAL provider) in current QGIS project and Flat Plane (a flat plane at zero altitude). There is a preview on the right side.

Tutorial — Qgis2threejs Plugin 2.4 documentation

```
""" This script should be run from the Python consol inside QGIS. It adds online sources to the QGIS Browser. Each source should contain a list with the following items (string type): [sourcetype, title, authconfig, password, referer, url, username, zmax, zmin] You can add or remove sources from the sources section of the code.
```
