The Kardashev scale is a method of measuring a civilization's level of technological advancement based on the amount of energy they are able to use. The measure was proposed by Soviet astronomer Nikolai Kardashev in 1964. The scale has three designated categories: A Type I civilization, also called a planetary civilization—can use and store all of the energy available on its planet.

Kardashev scale - Wikipedia

Dostoevsky reportedly said that "The degree of civilization in a society can be judged by entering its prisons." Lastly John F. Kennedy in a message to Congress said that "On the basis of his study of the world's great civilizations, the historian Toynbee concluded that a society's quality and durability can best be measured 'by
