### Word Problems Worksheets | Two Step Equations Word ...

Two step math equations are algebraic problems that require you to make two moves to find the value of the unknown variable. For example, using the equation  $3x + 5 = 11$  we will need to perform two steps to find the value of  $x$ . The first step would be to get the constant values of the equation by themselves. In this case 5 and 11 are our constants.
